

# Smelly Potions

Some male moths use their feathery antennae to 'smell' where the females are from miles away! Have a go at making your own smelly potion and see if it attracts anything..

## Resources

Small plastic pot

## Instructions

1. **Take your pot and fill it with small bits of plants and flowers and anything else natural that you find. Give it a mix with a twig or shake it up.**
2. **Give your magic potion a name and decide what the potion will do for this habitat.**
